

HOW TO BUILD RELATIONSHIPS IN EDUCATION

Course participants

International staff, teachers, educators, trainers, educators of primary schools, kindergartens and nurseries

Course objective

Equal opportunities and overcoming barriers in the possibility of using modern technologies in the work of a pedagogue

Course description

Five-day training including short theoretical lectures combined with extensive practical workshops. The workshops will be based on the use of free online tools; thanks to this, none of the people participating in the training will be obliged to incur additional costs for the purchase of software.

Day 1 Relations in education

Areas of analysis for all relationships in the area of teachers - students - parents. This applies to both the relationship between the group of teachers and students' parents and, above all, problematic situations in the area of teacher - students will be discussed; or teachers - parents. Positive Discipline in the work of a teacher.

Day 2 Characteristics of space in education

What adult behaviours evoke individual reactions of children or adolescents. What tools from positive discipline support the building of relationships both at home and during the education process at school or kindergarten.

Day 3 Human nervous system and self-regulation

- Sympathetic nervous system,

- parasympathetic nervous system,
- emotions and the role of empathy

Day 4 Balance and student involvement in class

Introduction to self-regulation, i.e. the ability to monitor and modify emotions, control impulses and delay gratification.

Day 5 Regulation, self-regulation and co-regulation

Workshops on techniques and the use of effective tools that help in achieving measurable educational successes, while maintaining job satisfaction.

Course fee: 350,00 € (5 days)

Course date: 20 - 24 April 2020
